Form teacher comment:

Considering Hibaq started later in the autumn term at Ark Academy, she has made a very impressive start. Her performance across the different subject areas has been amazing, particularly in Mathematics, Science and History where she is already working above her end of year target. She has also participated extremely well in other areas of the school such as the fundraising activities for Newton House, and has been a great team-member. She however needs to apply the same amount of effort in all subjects and is currently not matching expectations in Drama and Music.

Form teacher comment:

Shadia has made an excellent start to Ark Academy. Her autumn term results are very pleasing, particularly in English, Science, Maths, R.E, Art & Design, History and IT, where she is currently working above target. The effort that she has put into her class work and homework is certainly paying off. Further to this, Shadia demonstrates Ark Academy's core value of participation through her involvement on both the girls' football and basketball team. I am concerned, however, that she is below target in Geography and I would suggest that she talks to Mrs Haslam about the areas that she needs to improve ready for the next assessment.
